

### CELLULAR BASE UNIT

PRODUCT #:  
MT-9103CBU-ITC-76-100-586

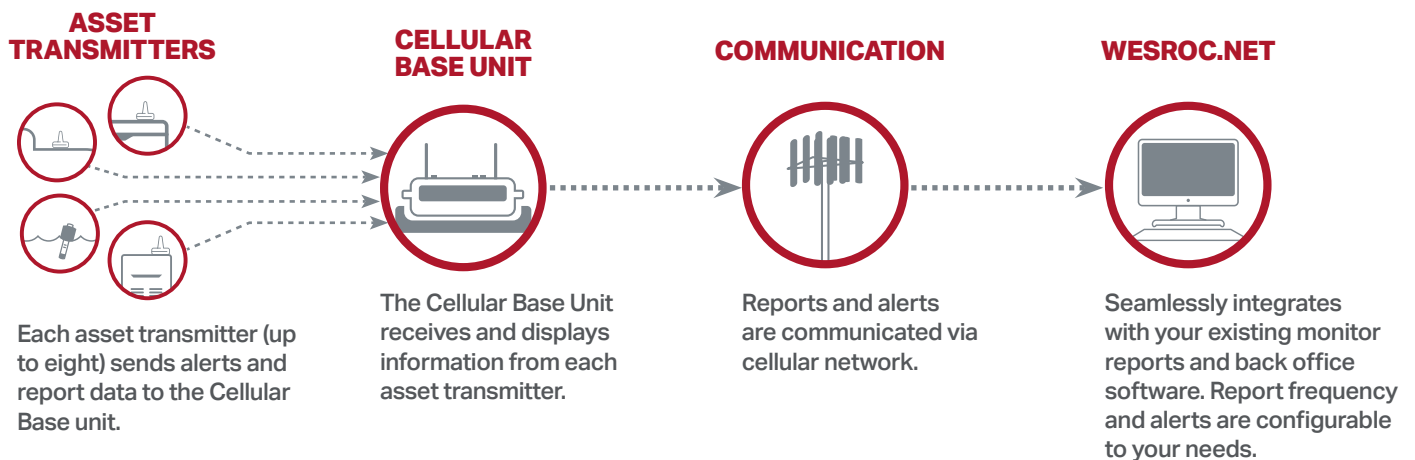

## Monitor up to eight assets on any property or location

This innovative device is for properties with multiple assets in addition to propane or fuel oil tanks.

Agricultural customers will often have assets such as barns and coops where it makes sense to monitor the building temperature, as well as the tank fueling the heat for the same building. Active diesel tanks and other chemical tanks are

also a frequently monitored assets on agricultural locations.

Seasonal homes are also a common application for the Cellular Base Unit. With the ability to alert to water leaks, furnace burner lock-outs, room temperatures and pool temperatures, this device enables you to provide winter protection for your customer's home.

## Cellular Base Unit

### TOP TAKEAWAY POINTS

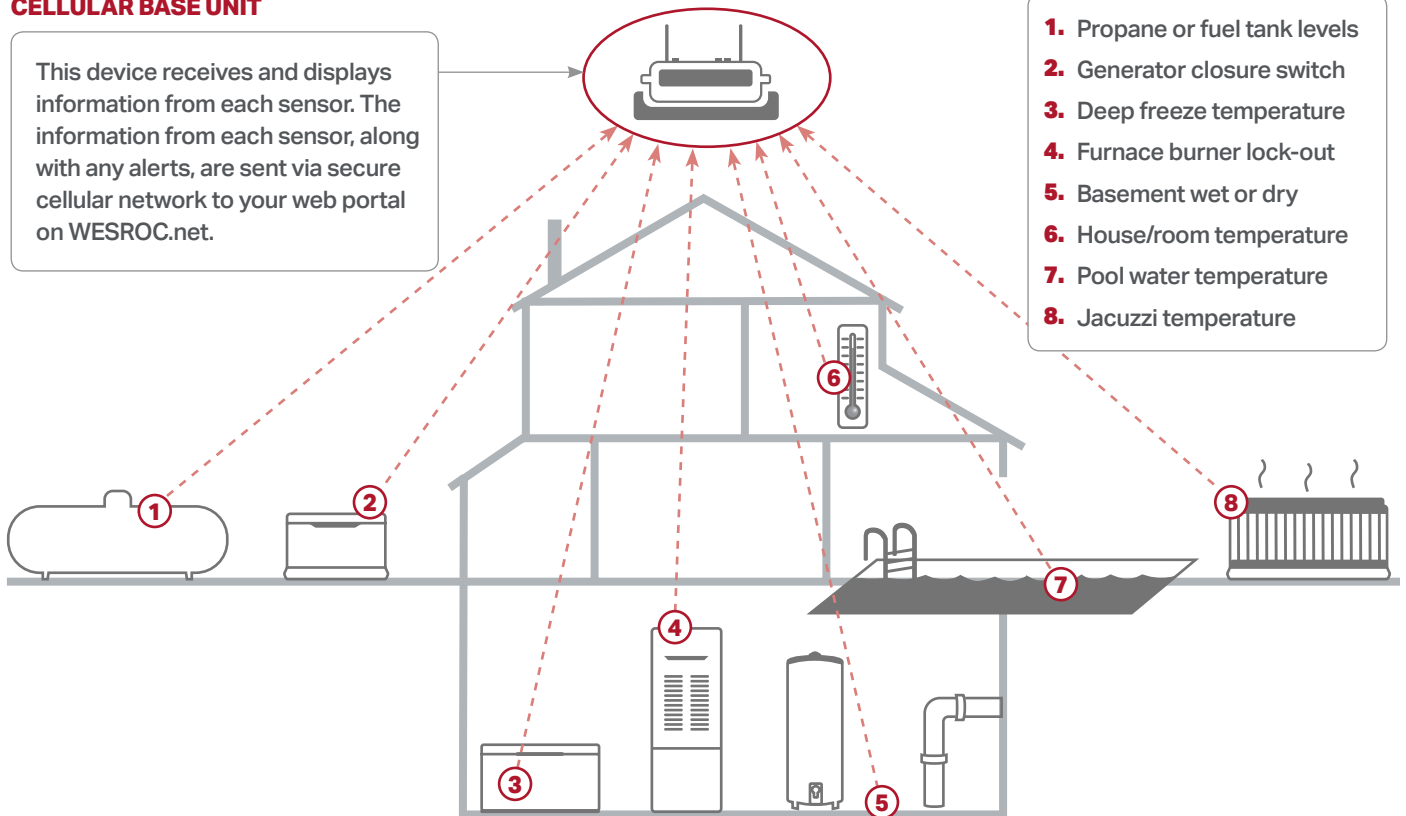

- Enables monitoring for up to eight assets
- Access to tank levels and temperatures
- Alerts to high/low temperatures, power outages, generator failures and burner lock-outs
- Works during power outage using back-up battery
- Features large interactive display with adjustable brightness

### CELLULAR BASE UNIT
