

GUIDED WAVE RADAR TANK MONITORING HARDWARE

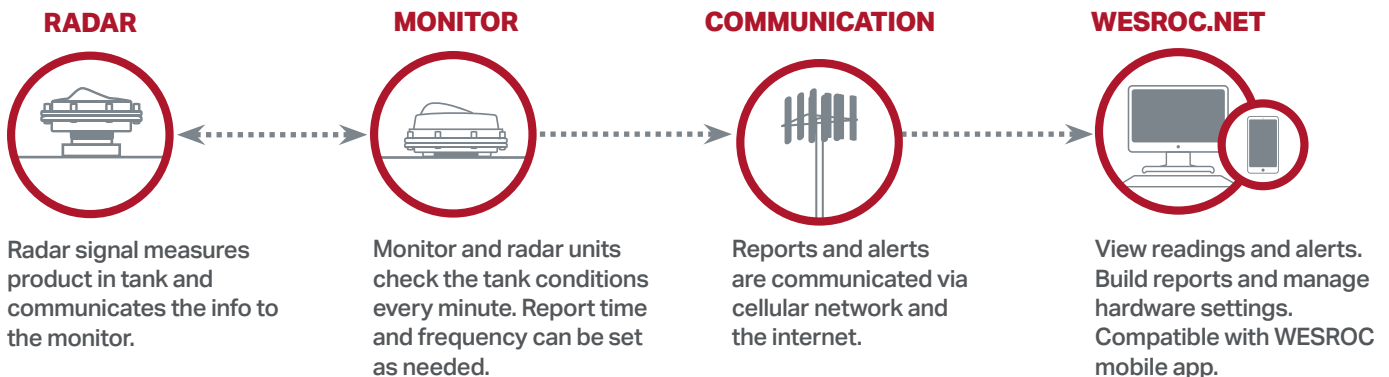

Monitor and measure your tank levels with precise accuracy

The WESROC guided wave radar (GWR) monitoring hardware enables you to measure your tank levels accurate to within plus or minus 2%. Installing the GWR is quick and easy, and threads into standard 1.5" and 2" openings.

GWR is beneficial for monitoring non-standard sized tanks, tanks with limited

openings, and tanks where float gauges are inapplicable.

The GWR hardware is waterproof and made of materials resistant to fuel and chemicals. Extremely durable and reliable, the case can perform in harsh weather conditions.

Guided Wave Radar Monitoring Kit

- Accurate measuring within +/-2%
- Durable, fuel and chemical resistant, waterproof case
- Easy installation, accommodates tanks with limited openings
- High/low temperature alert capable

DIMENSIONS

Size: 5" long x 5" wide x 3.1" tall

Weight: 1.4 lbs.

APPLICATIONS

- Fuel oil
- Diesel
- DEF
- Kerosene
- Jet Fuel
- Hydraulic Oils
- Lube-Oils
- Antifreeze

GWR DEVICE FEATURES

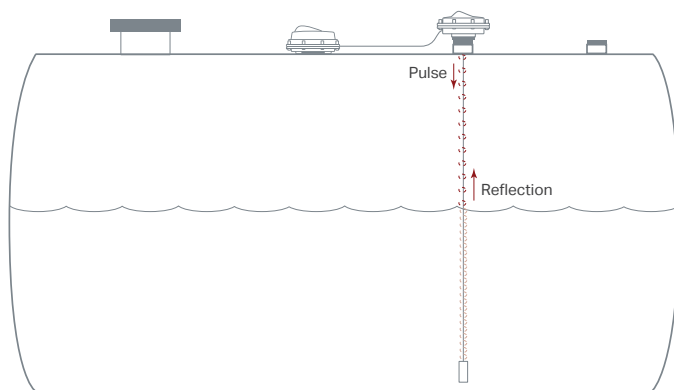

- Fuel and chemical resistant
- Water sealed with fuel resistant neoprene gasket
- High impact resistant (Tensile strength rated at 10,000 PSI)
- High shear and flexural strength even at high and low temperatures
- No internal battery, powered by monitor
- UV resistant, stabilized polycarbonate
- Maximum tank height 72"

MONITOR FEATURES

- Over five year battery life with daily reporting
- Operating temperature range of -40C to +60C (-40F to + 140F)
- Safe, field replaceable, waterproof battery package
- Intrinsically safe case enclosure

WESROC.NET REPORTING FEATURES

- Tank conditions are checked every minute for instant reporting
- Easily schedule when and how often reports are delivered
- Configure warning and critical alarm thresholds for low or high tank levels
- Level, fill event, draw rate and manually triggered reports
- View and track cellular system information and signal strength
- All fills are time stamped and reported immediately
