

Prevent costly overfills while saving time.

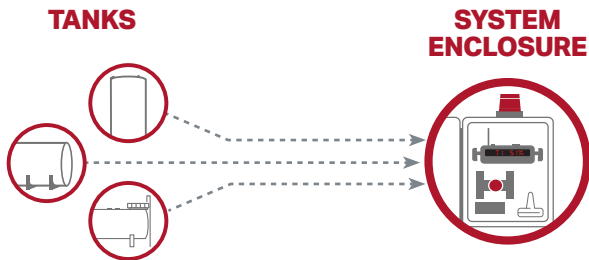

WESROC's Overfill Alarm monitoring system enables drivers to view the tank level of your tanks before filling them. The digital display shows the tank level of up to eight tanks.

When a tank is filled past its preset overfill level, a loud audio alarm will sound with a red flashing light. The alarm can be silenced with the 'Silence Alarm' button in the enclosure.

The easy-to-install system utilizes wireless technology, making it safer than a direct wired system.

TOP TAKEAWAY POINTS

- View tank levels via digital display
- Monitor up to eight tanks
- Loud alarm sounds with red flashing light in the event of an overfill
- All activity is logged in your WESROC.net web portal when paired with cellular tank monitors
