

## Increase efficiency by monitoring your active bulk propane tanks.

Monitor your bulk storage tanks to accurately route bulk deliveries, and verify delivery location and product amount. Also prevent costly billing errors and fraud attempts with precise tank level and activity data.

Easily communicate tank activity via text or email to necessary parties. You can

also involve your suppliers to coordinate transports and prevent your own runouts.

WESROC tank monitoring hardware and the tank activity data is also used to meet government security monitoring requirements on certain bulk storage tanks.

### STORAGE TANKS WITH VISUAL DIALS

- Rochester & Taylor Mounts
- 4" and 8" dials

### STORAGE TANKS WITH ROTO GAUGES

- Standpipe monitoring
- 4 to 20 mA conversion

### EMAIL AND TEXT ALERT OPTIONS

- Low Tank Level
- Power Outage
- High or Low Pressure
- Product Temperature
- Ambient Temperature
- Percent change
