

RESIDENTIAL LTE CELLULAR UNIT

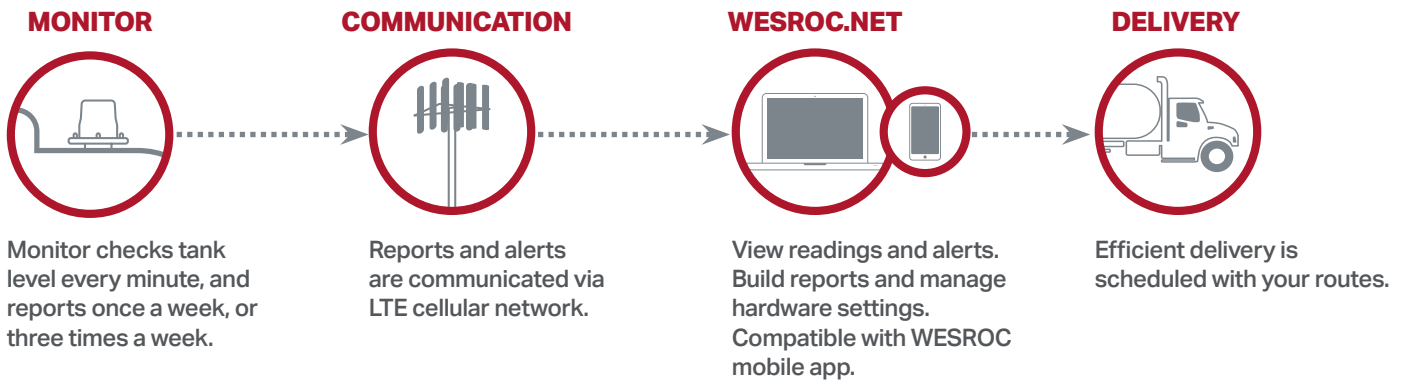

Eliminate the guess work from unpredictable tanks.

The WESROC LTE RTM is the perfect solution for planning efficient deliveries for hard to predict residential customers, such as those with heat pumps, wood burners, pool heaters, or standby generators.

The WESROC Residential Tank Monitor keeps you informed with the necessary tank information you need to schedule efficient deliveries while preventing costly run-outs.

The LTE RTM is flexible to your business's reporting needs and can be configured to report once a week, or three times a week.

This advanced monitor communicates using the Long-term Evolution (LTE) cellular network, it is the latest cellular network available for machine-to-machine communication. This network ensures the long-term viability of your monitoring hardware by protecting you from network obsolescence.

Residential Cellular Tank Monitor

- Once-a-week or three-times-a-week reporting options
- Three year warranty
- Typically over five year battery life with weekly reporting
- Available on AT&T and Verizon cellular networks
- Field replaceable battery
- Low monthly reporting costs
- Operating temperature range of -40F to +140F

DIMENSIONS

Approx: 6" tall x 5" wide
Weight: 2 lbs. 4 oz. (33 kg)
